Introduction

This document describes installation and running OAppStore, along with uninstallation instructions.

OAppStore is an application that allows users to add Applications that can be managed by the AppStore. This allows for running applications in multiple environments with different versions. Applications can be ran as Server, Client, Single. A Client application will connect to a Server.

The installation was created using Java jpackage and includes Java version 21.

OAppStore allows installing, managing and running other Applications.

OABuilder can be installed and ran from OAppStore, and applications created using OABuilder will be able to be used from OAppStore.

Source code

OAppStore is open source and is stored on GitHub. It is located at ViaOA, in the “oaappstore” project .

Applications that have been made available to the AppStore are stored in the “oaappstore-run” project.

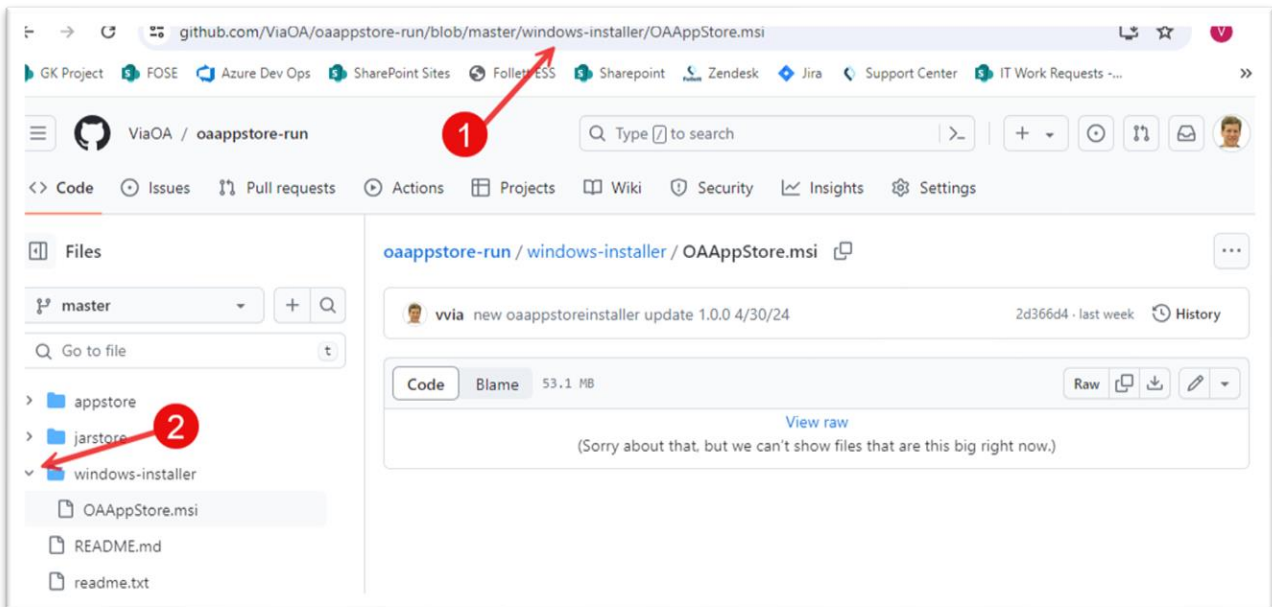

See github for more information.

Windows Installer for OAAppStore

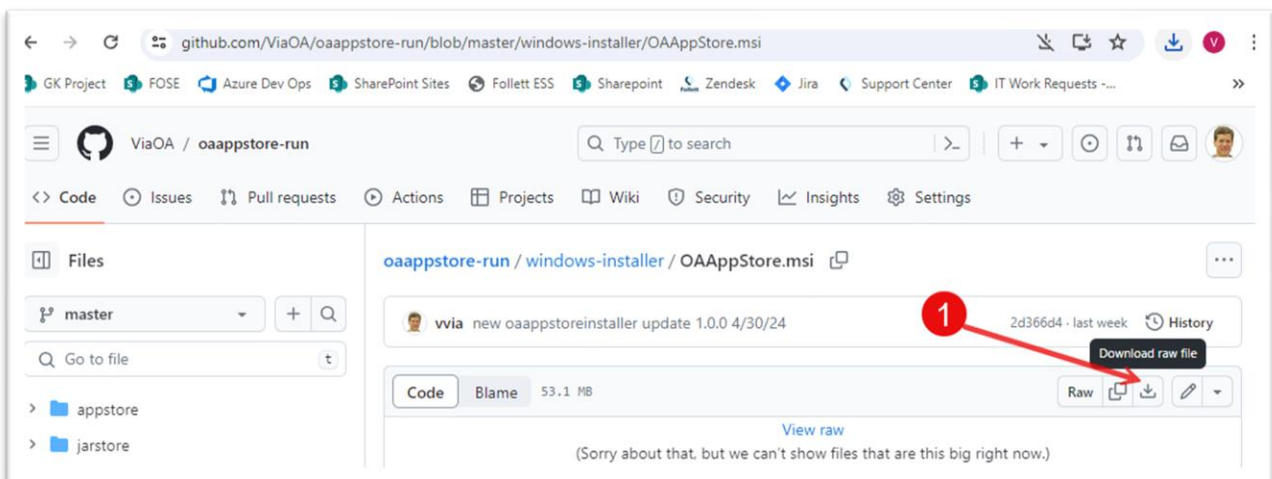

Download Windows Installer

Using your browser (image shows Chrome)

www.github.com/ViaOA/oaappstore-run/blob/master/windows-installer/OAAppStore.msi

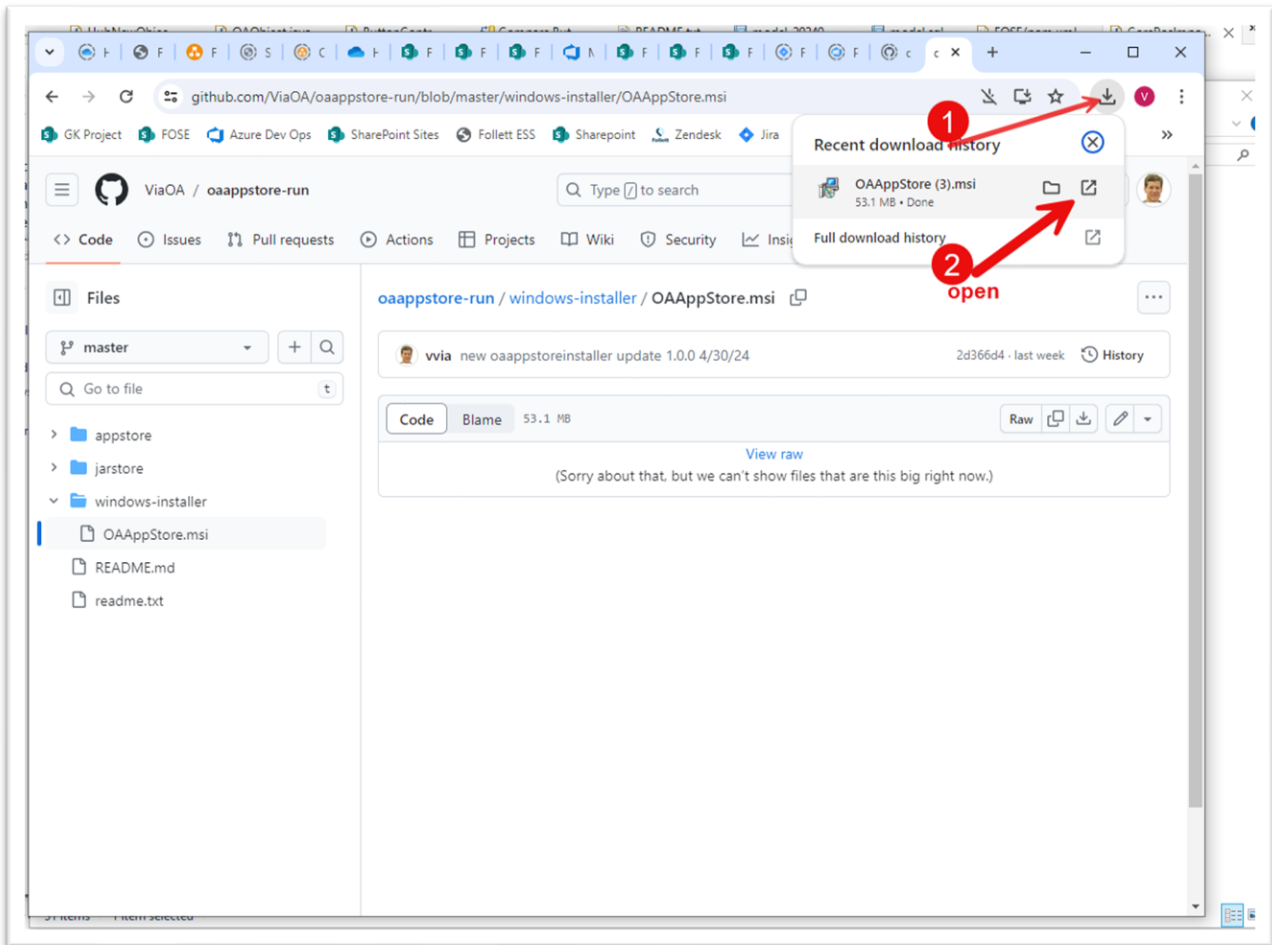

Download the file named OAAppStore.msi

Windows Installer for OAAppStore

Open and run OAAppStore.msi

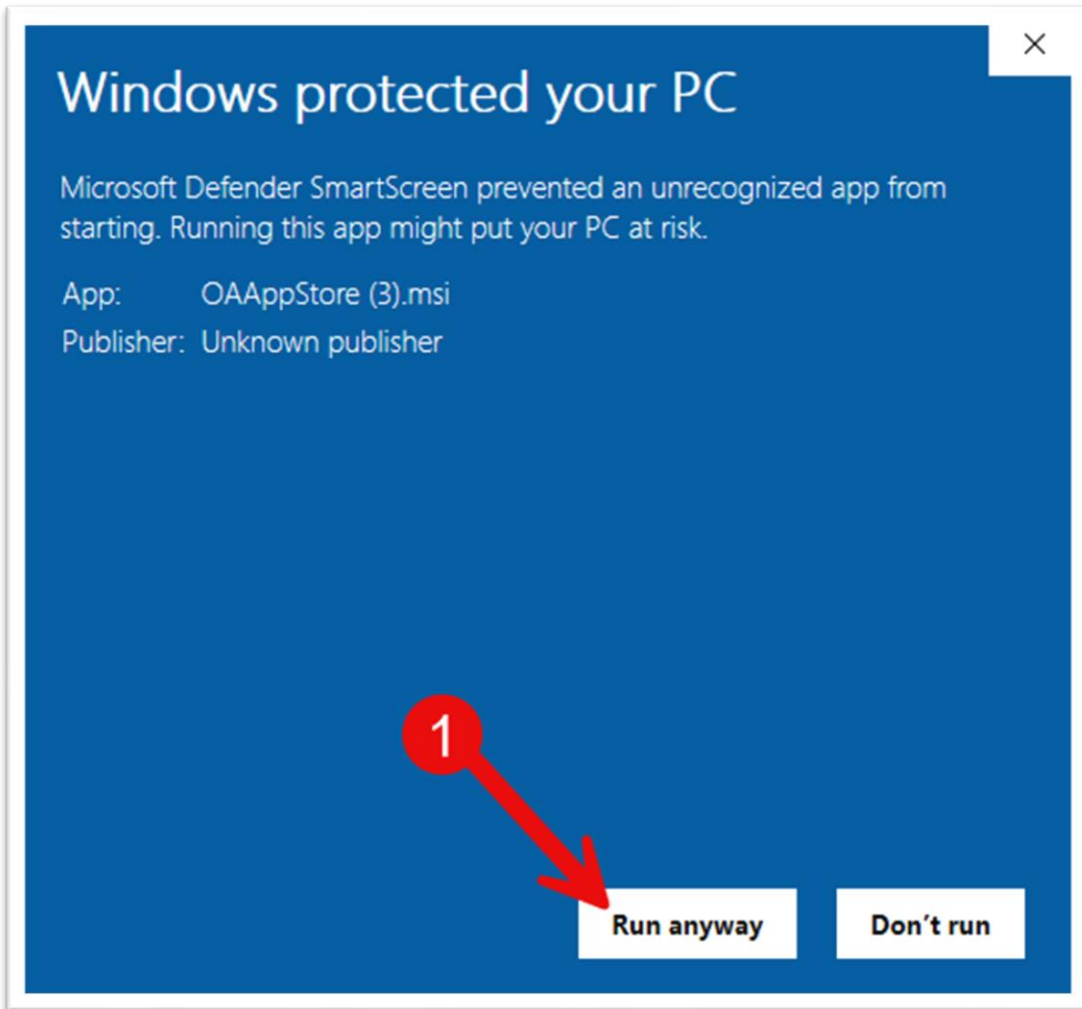

Running the Windows Installer will first show a Windows Defender message.

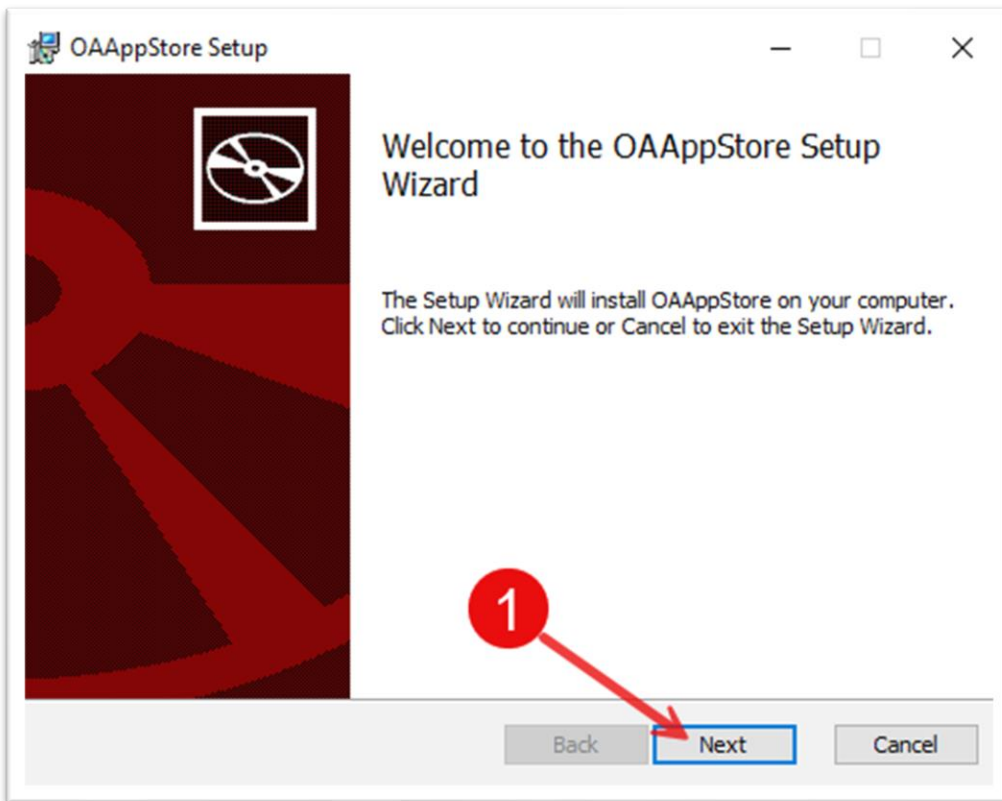

Select "More Info" to give permission to install.

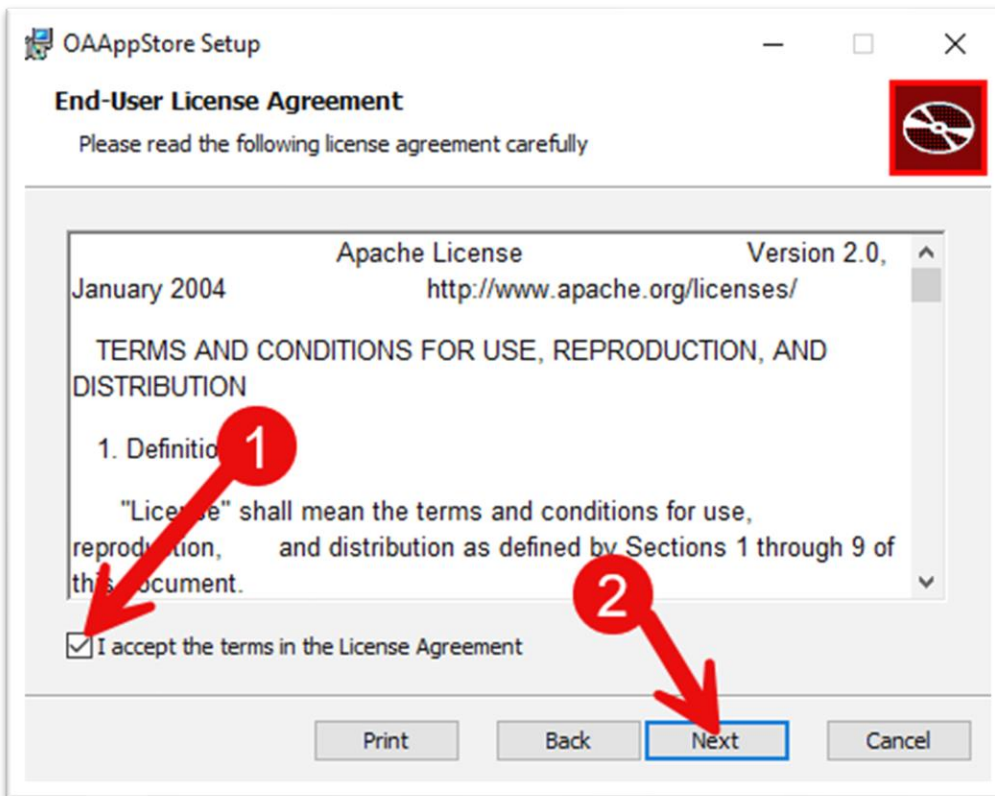

Select Run anyway to begin installation.

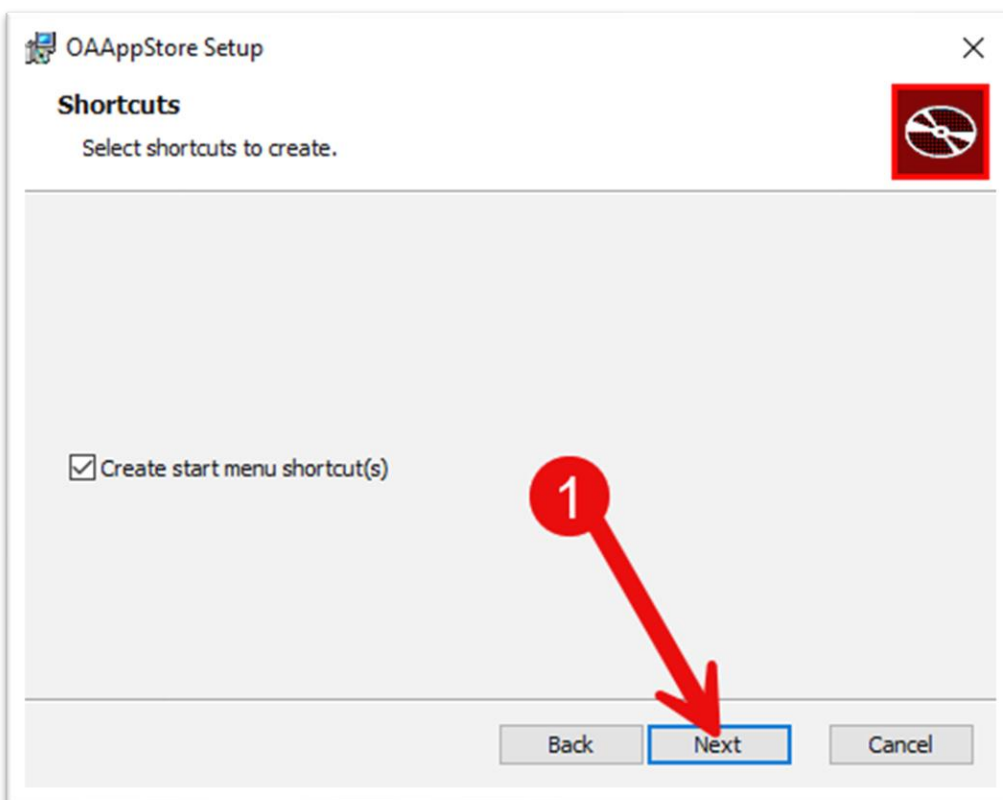

Setup will be displayed, select “Next” button.

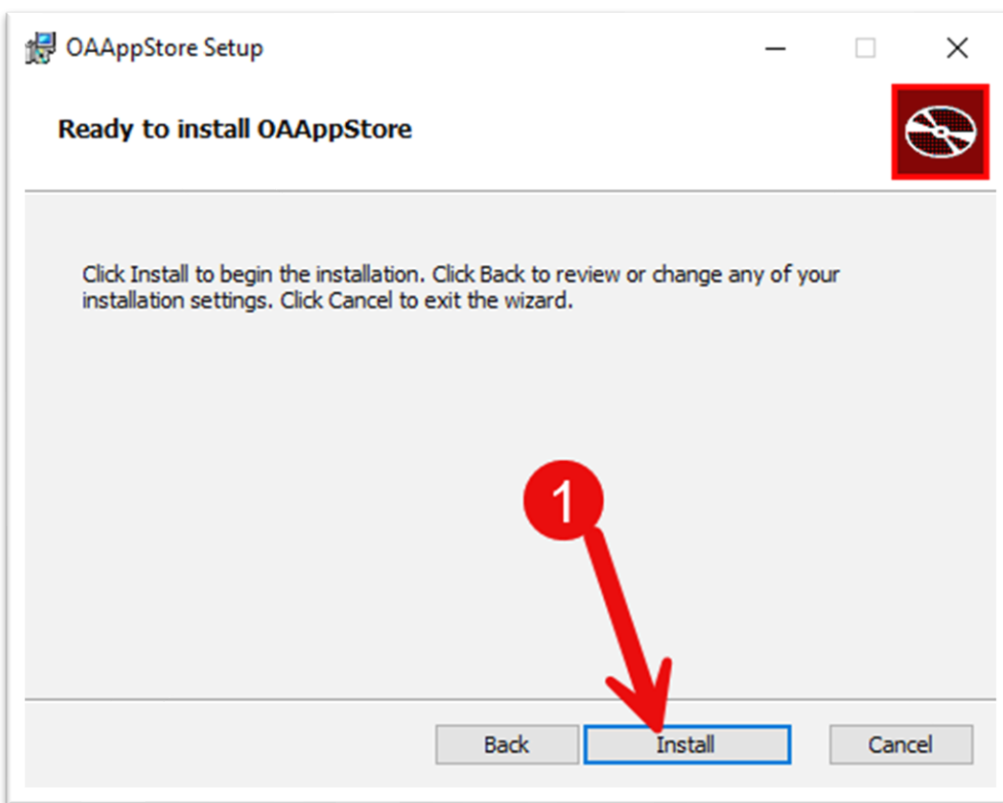

Accept the license, and select “Next” button.

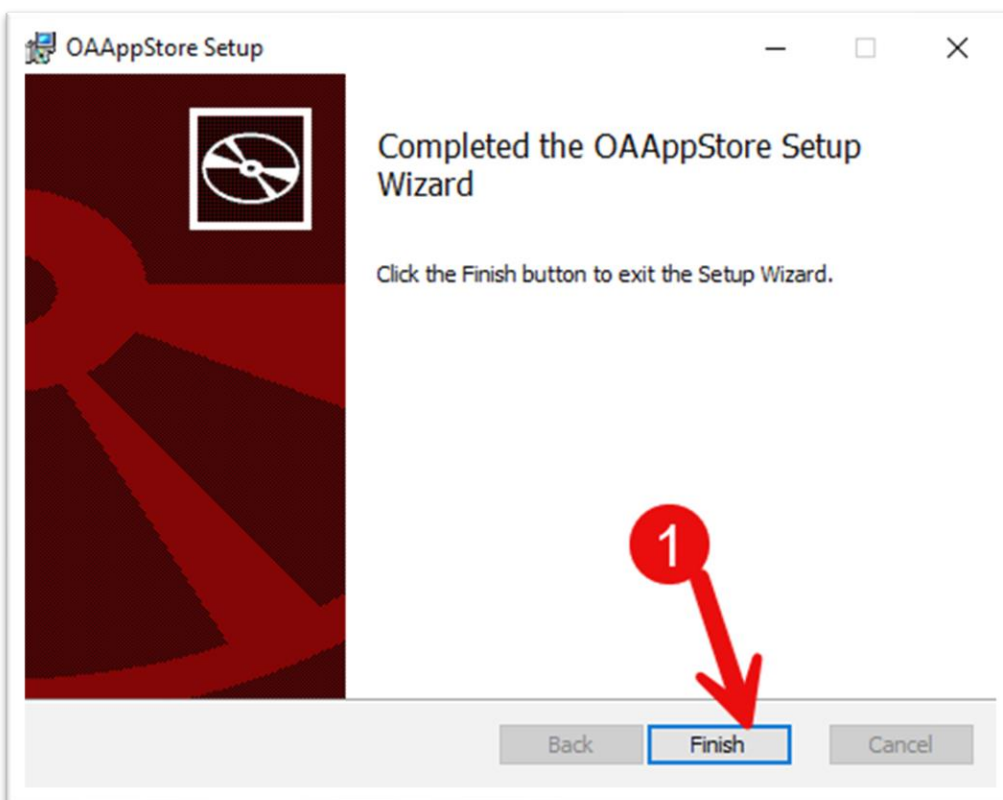

Select "Next" button

Select "Install"

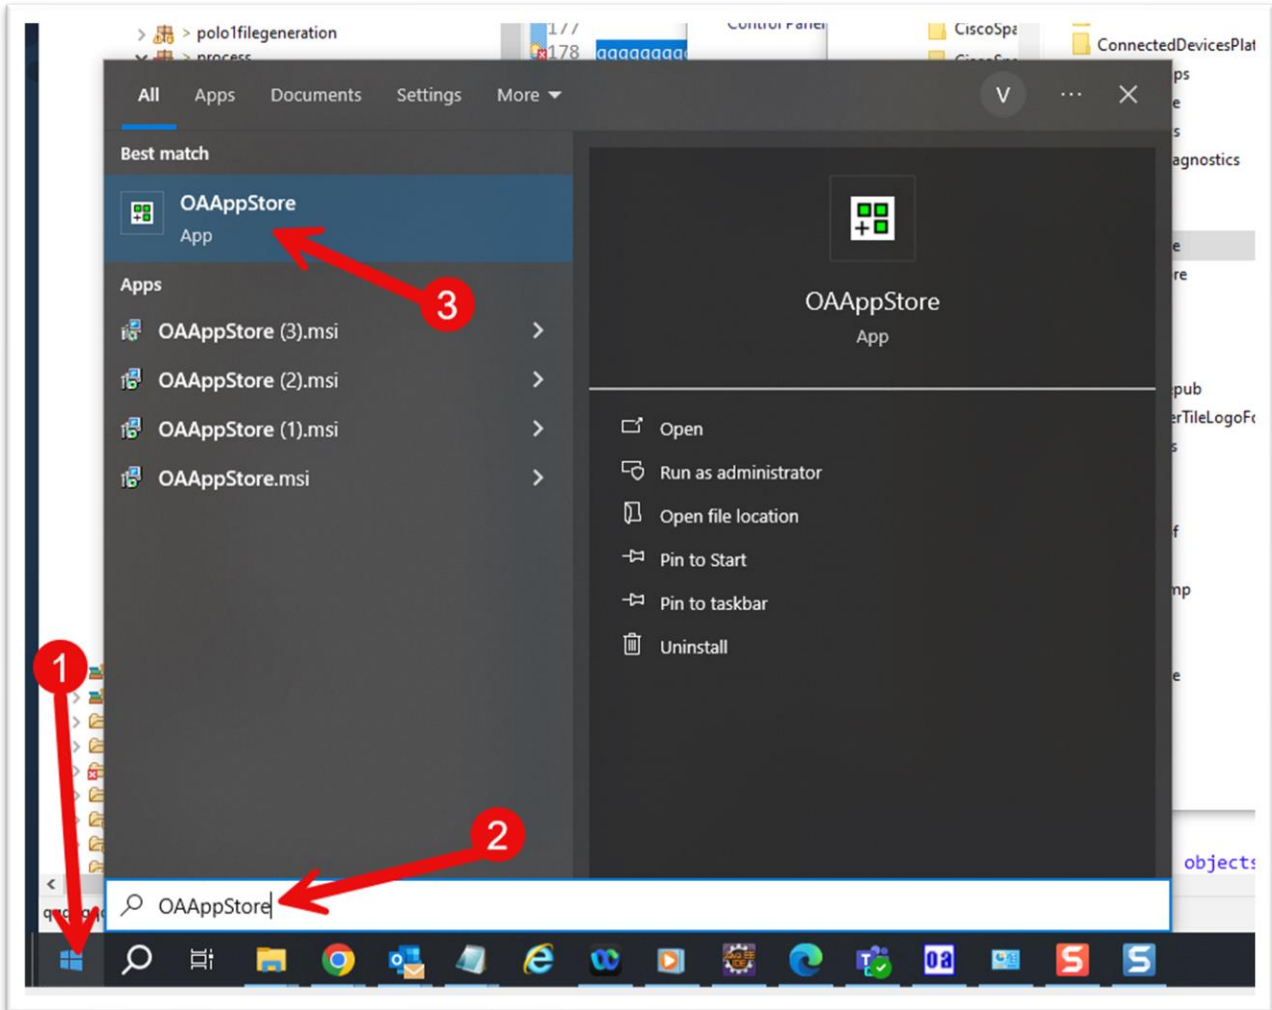

Install completed

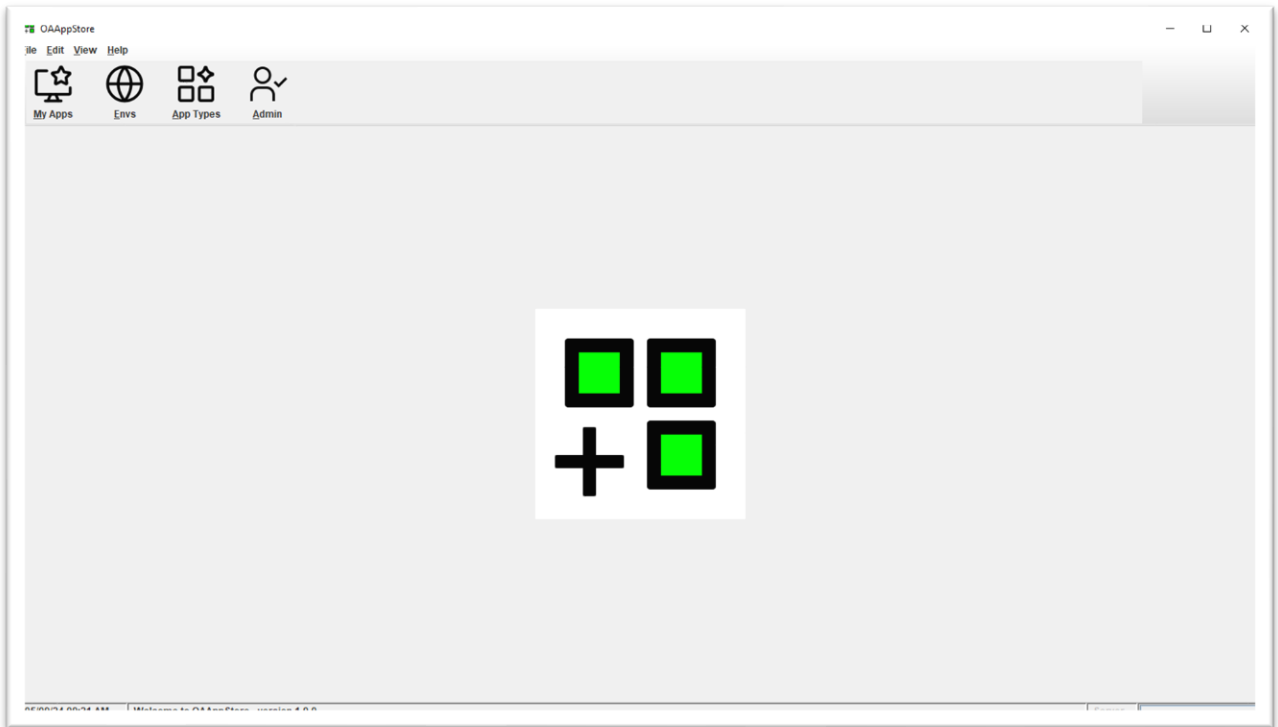

Running OAAppStore from Windows

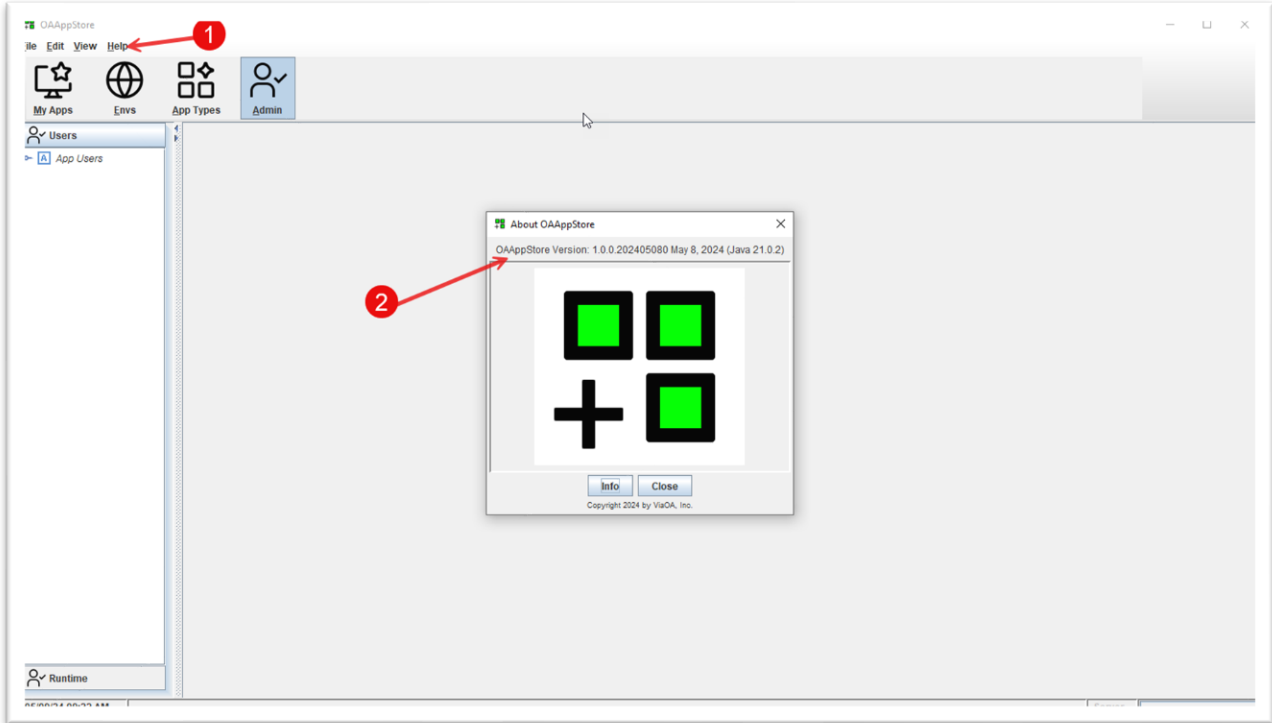

1: Select Windows “Start” button, 2: type “OAAppStore”, 3: click App.

Application will run.

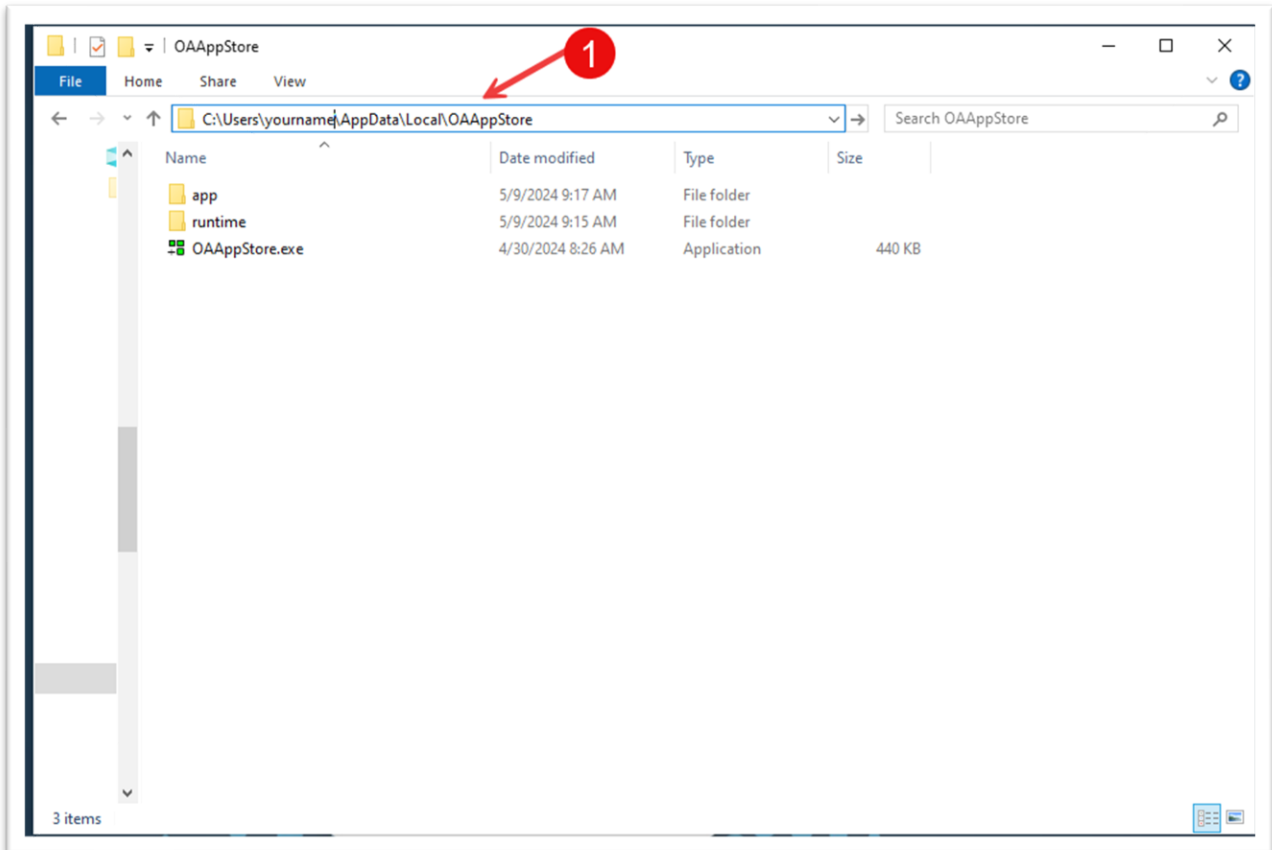

Choose menu “Help” and then “About” to see version and release information.

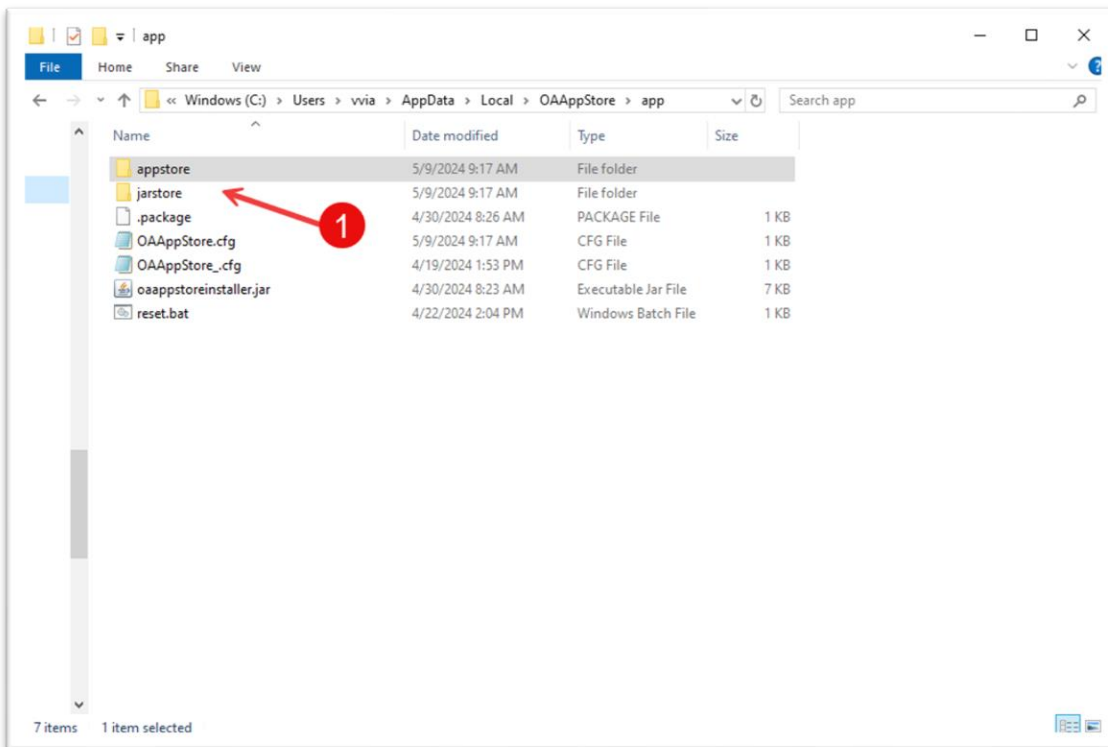

Program Installation location

Program will be running from Users "AppData\Local" directory.

All Apps will be stored under the “appstore” directory, and all code (Java *.jar files) will be under the “jarstore” directory.

Uninstalling OAAppStore from Windows

1: Select Windows “Start” button, 2: enter “OAAppStore”, 3: mouse right-click, 4: choose “Uninstall” from the popup menu.
